

Appendix

Markus Radke* and Steffen Lepa*

A. Detailed FOLDCAT flowchart for folding COMGET to identify genre categories

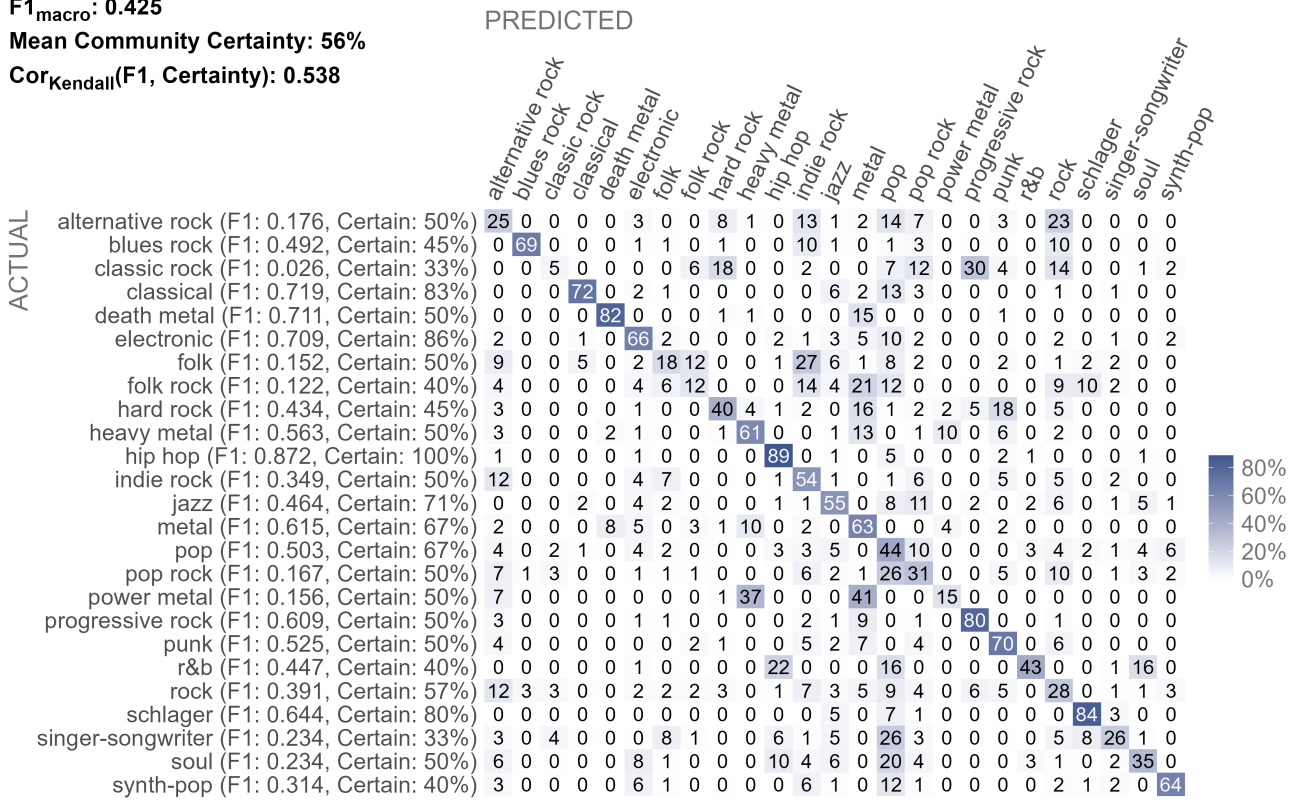

* Audio Communication Group, Technische Universität Berlin, Einsteinufer 17c, 10587 Berlin, Germany

B. Confusion Matrices and Variable Importances for COMGET-G25 and COMGET-G32

 $F1_{\text{macro}}$: 0.425

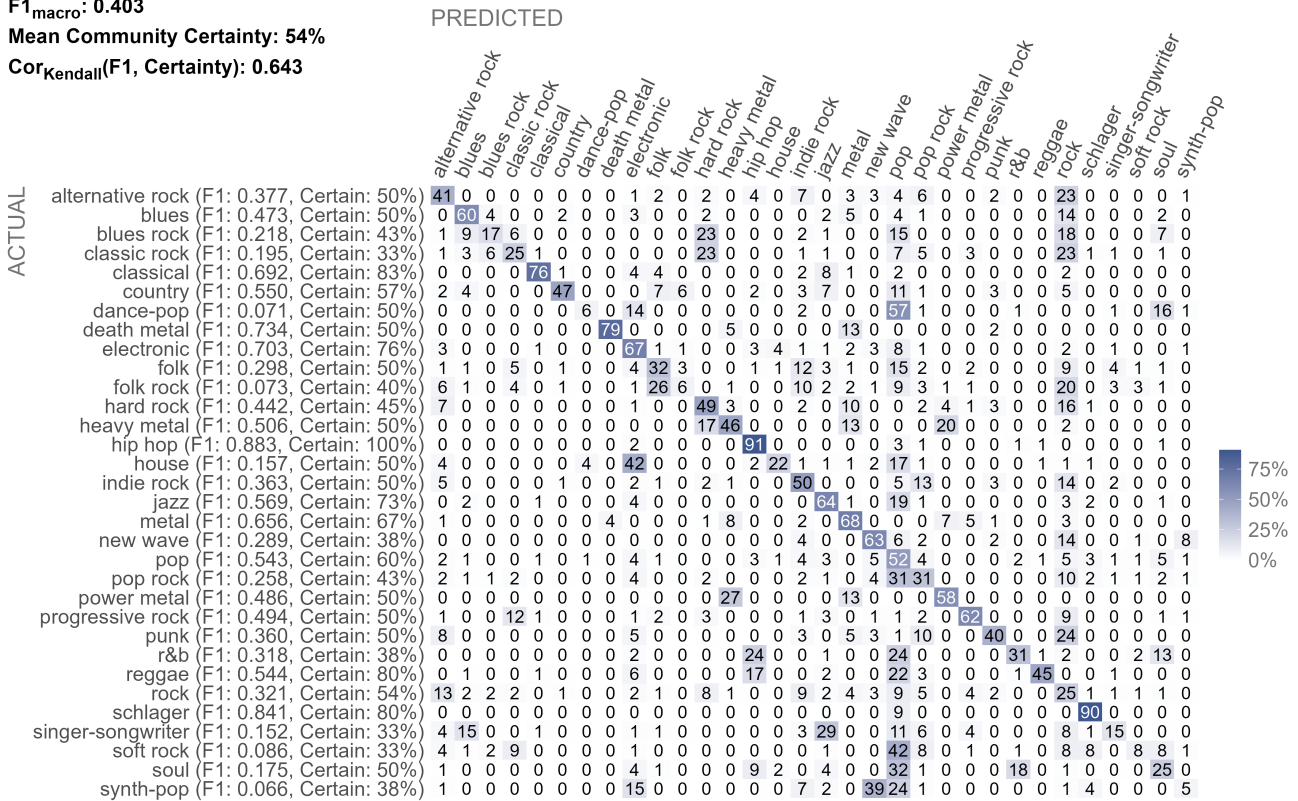

Mean Community Certainty: 56%

 $\text{Cor}_{\text{Kendall}}(F1, \text{Certainty})$: 0.538

(a) COMGET-G25

 $F1_{\text{macro}}$: 0.403

Mean Community Certainty: 54%

 $\text{Cor}_{\text{Kendall}}(F1, \text{Certainty})$: 0.643

(a) COMGET-G25

(b) COMGET-G32

Figure B.2: Top 20 most important features for automated classification at high and very high granularity. Values show relative feature importance from the final LightGBM models.

C. Github Repository
